

## Checking test

### I variant

#### 1. Translate into Russian:

In an information society a person who is computer-literate need not be an expert on the design of computers. He needn't even know much about how to prepare *programs* which are the instructions that direct the operations of computers. All of us are already on the way to becoming computer-literate. Just think of your everyday life. If you receive a subscription magazine in the post-office, it is probably addressed to you by a computer. If you buy something with a bank credit card or pay a bill by check, computers help you process the information. When you check out at the counter of your store, a computer assists the checkout clerk and the store manager. When you visit your doctor, your schedules and bills and special services, such as laboratory tests, are prepared by computer. Many actions that you have taken or observed have much in common. Each relates to some aspect of a data processing system.

#### 2. Write down the translation of terms:

- 1) hardware
- 2) power
- 3) performance
- 4) circuit
- 5) storage
- 6) central processing unit (CPU)
- 7) basics
- 8) instruction
- 9) be aware of
- 10) computer literacy

#### 3. Fill in the missing words in the gaps below.

The hardware can be divided into components for input, \_\_\_\_\_, \_\_\_\_\_ and storage.

Input components are used to \_\_\_\_\_.

It includes: keyboard, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_.

\_\_\_\_\_ components are responsible for providing the user with data from computer output (images, sounds, videos, text and others).

It includes: monitor, \_\_\_\_\_, \_\_\_\_\_.

Within the \_\_\_\_\_ components, data are processed and information is generated that will be displayed on the output components. The main component is \_\_\_\_\_ .

Storage components need for \_\_\_\_\_ .  
It includes: DVD/CD, \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_ .
