Председатель _____ /Дымская А.Ю./	**Билет к дифференцированному зачёту №1** Дисциплина: ОГСЭ.03 Иностранный язык в профессиональной деятельности Специальность: 09.02.06 Сетевое и системное администрирование Семестр: 6 Группа: СА50-1-21, СА50-2-21	УТВЕРЖДАЮ Заместитель директора по учебной работе _____ / Клопов Д.А. / «29» апреля 2024г..

№1. Read and translate the text. Answer the questions after the text:

The internet has changed dramatically from its origins. It has grown from a tool used by a small number of universities and government agencies to a worldwide network with more than 3 billion users. It has changed the way people communicate and do business, bringing many opportunities and benefits. Today the Internet continues to grow and expand in new and varied ways.

When the Internet started, the majority of connected devices were only computers, whether for personal use or within a company. Recently an increasing variety of devices beyond computers, including smartphones, smart cars, appliances, vending machines, smart homes, and smart buildings, can connect and share data.

The Internet as we know it today is expanding rapidly as the Internet of Things (IoT) takes over and impacts our day-to-day lives. Although the Internet officially started back in 1969, the extent to which people depend on the Internet is new. Today, people interact with the Internet and cyberspace as part of normal day-to-day living. This includes personal use and business use. Users must now address issues of privacy data security and business data security. Security threats can come from either personal or business use of your Internet-connected device. Intelligent and aggressive cybercriminals, terrorists, and scam artists lurk in the shadows. Connecting your computers or devices to the Internet immediately exposes them to attack.

A) What security threats are mentioned in this text?

B) What devices used the Internet the year it appeared? C) Give a list of smart devices mentioned in a text.

№2. Give the definition (explain) the given terms in English:
• Server-side programming
• Cascading Style Sheets (CSS)
• Hypertext Markup Language (HTML)
